## ABSTRACT

Typological classification of projectile points found on prehistoric archaeological sites has long been recognized and employed by archaeologists as a reliable means of assessing site age and cultural affiliation. The purpose of this study was to classify projectile points from prehistoric sites in North Carolina recorded by early archaeological surveys in order to provide more detailed cultural and chronological information about those sites. Most of the analyzed artifacts were collected prior to about 1960, and are curated at the Research Laboratories of Anthropology, University of North Carolina, Chapel Hill. This study resulted in the classification of 22,244 projectile points and 105 other artifacts, and provides important new information for 1,313 presently-known archaeological sites in 50 separate North Carolina counties. This information should greatly assist efforts directed toward historic preservation planning, archaeological site prediction and evaluation, and research.

It is also hoped that this project has demonstrated the cost-effectiveness of enhancing the quality of North Carolina's archaeological site files through the systematic analysis of extant artifact collections.

## INTRODUCTION

The Projectile Point Classification Project was undertaken to provide more detailed cultural and chronological information about numerous prehistoric archaeological sites recorded during early archaeological surveys of North Carolina. Although the locations of these sites have been known for many years, the cultural components at these sites were largely unknown or poorly recognized. The project's goal was accomplished by the systematic classification of culturally and chronologically sensitive lithic artifacts (namely, projectile points and a few other tool types) and the subsequent compilation of a classified artifact inventory. Although the primary purpose of this inventory is to upgrade the State's archaeological site files housed at the Office of State Archaeology, the data contained in this inventory also comprise an important source of information for future research and will allow the Research Laboratories of Anthropology (RLA) to manage and utilize its collections more effectively.

This study was partially funded by a survey and planning grant from the United States Department of the Interior and administered by the Office of State Archaeology, North Carolina Division of Archives and History. These funds were matched by cash and in-kind support from the Research Laboratories of Anthropology, University of North Carolina, Chapel Hill. The study also was conducted at the Research Laboratories of Anthropology.

Artifact classification was performed by I. Randolph Daniel, Jr., in consultation with R. P. Stephen Davis, Jr. Ms. Heather Percy assisted with entering data onto computer files. All computer analyses were conducted by Davis using microcomputers at the Research Laboratories of Anthropology and the mainframe computers at the University of North Carolina.

## BACKGROUND

Background research and preparation was undertaken in four phases. First, an analysis format was developed for coding projectile points and selected other artifacts by site number, catalog number, formal type, raw material type, and type of modification (if any). This format closely follows a lithic artifact analysis format currently used by the Research Laboratories of Anthropology for its Siouan Project (Table 1).

Second, comparative type collections were developed. Most of the artifacts in these collections are illustrated specimens that accompanied the original type descriptions (large defined by Coe 1964, Keel 1976, and Oliver 1981) and are on file at the RLA.

Third, the accession records and specimen catalogs at the Research Laboratories of Anthropology were used to identify early survey collections that could be efficiently targeted for

study. It was decided that the project would focus initially on collections made prior to 1960 at sites in the North Carolina Piedmont. If completed within the time allotted for the study, additional collections made after 1960, as well as collections from both the mountains and coastal plain of North Carolina, would then be examined. The Piedmont was considered a logical starting point since most of the early surveys focused on this area, particularly the Uwharrie region of the south-central Piedmont. In addition, systematic coverage of this area would provide useful information for a study of late Paleo-Indian and Early Archaic adaptations by Daniel. Most collections lacking specific site provenience were omitted from the analysis, as were collections from major excavations at sites such as Town Creek (31Mg2, 31Mg3), Doerschuk (31Mg22), Hardaway (31St4), and Wall (31Or11). Most of these latter collections either had already been analyzed or are in the process of being analyzed by other researchers.

Finally, all collections to be analyzed were physically located. This phase was by far the simplest since these artifacts, curated by the RLA, are filed together in wooden trays and arranged in sequential order by catalog number.

Actual classification of artifacts began in August, 1989 and was completed in January, 1990.

## ARTIFACT ANALYSIS

Analysis of projectile points and other selected artifacts was limited to: (1) the identification of artifact provenience (e.g., State site number and UNC-RLA catalog number), (2) the classification by projectile point type (or scraper type), (3) the determination of general raw material type, and (4) the recording of any subsequent modification (other than simple resharpening or breakage). These data were originally recorded on computer coding sheets and subsequently entered into a computer file (see Table 1). Specific aspects of analysis, including the definition of projectile point and scraper types, are summarized below.

### Site Number

State site designations were recorded for each analyzed artifact. Although the Research Laboratories of Anthropology's site numbering system differs with the official state system for sites recorded after about 1980, this did not pose a problem since most analyzed collections came from sites recorded before 1970 and all were recorded prior to 1978. A few artifacts were analyzed inadvertently from unidentified sites in Chatham, Montgomery, and Vance counties. The sites designations for these specimens are listed as 31Ch-Gen, 31Mg-Gen, and 31Vn-Gen, respectively.

### Catalog Number

The Research Laboratories of Anthropology (RLA) catalog number also was recorded for each artifact. This tripartite designation consists of an accession number (which identifies a specific site, survey, excavation, or donated collection), a specimen type (this designation was

"a" [for artifact] for all analyzed specimens), and a specimen number (which identifies a specific provenience and category of artifact within the accession designation). It provides a reference to more detailed provenience and descriptive data on file at the RLA. A few artifacts, on loan from Mr. Robert Weaver of Raleigh, NC, were not cataloged into the RLA system and are simply identified as "WeaverColl."

### Projectile Point Type Descriptions

Thirty-six previously defined types and six other general categories were used to classify projectile points. Descriptions of these are provided below in rough chronological order of their occurrence in the archaeological record. The cultural and chronological placement of these types is summarized in Table 2.

Clovis. Suhm, Krieger, and Jelks (1954) describe this type as a medium to large, auriculate, fluted point with an incurvate base. *Clovis* projectile points are associated with the Paleo-Indian period (before 8,000 B.C.) in the Southeastern United States.

Hardaway Blade. Coe (1964:64) describes this type as having "a broad, thin blade with a concave and thinned base." *Hardaway Blades* were recovered from basal deposits at the Hardaway site and are thought to date about 10,000 B.C. (Coe 1964).

Hardaway-Dalton. Coe (1964:64) describes the *Hardaway-Dalton* projectile point type as having a "broad, thin blade with deeply concave bases and shallow side-notches. Bases and side-notches were ground and edges were frequently serrated." This projectile point type is associated with the late Paleo-Indian period in piedmont North Carolina (before 8,000 B.C.) (Coe 1964; Ward 1983).

Hardaway Side-Notched. Coe (1964:67) describes the *Hardaway Side-Notched* type as having "a small, broad, thin blade with narrow side-notches and a recurved, concave base." This type is regarded as a specialized variant of the *Hardaway-Dalton* type and was found in basal deposits at the Hardaway site.

Palmer Corner-Notched. Coe (1964:67) describes the *Palmer Corner-Notched* projectile point type as having "a small corner-notched blade with a straight, ground base and pronounced serrations." This type dates to the Early Archaic period (ca. 8000 B.C.), and represents a transitional form from the *Hardaway Side-Notched* type to the *Kirk Corner-Notched* type.

Kirk Corner-Notched. Coe (1964:69) describes the *Kirk Corner-Notched* projectile point type as having "a large triangular blade with a straight base, corner-notches, and serrated edges." This is a predominant type of the Early Archaic period (ca. 8,000-6,000 B.C.).

St. Albans Side Notched. Broyles (1971:73) describes this type as a small triangular point with a side notched blade and a notched base. *St. Albans Side Notched* projectile points have been recovered from stratified, Early Archaic contexts (ca. 6,900-6,500 B.C.) at the Rose

Island, Icehouse Bottom, and Bacon Farm sites in southeast Tennessee (Chapman 1975, 1977, 1978), and at the St. Albans site in West Virginia (Broyles 1966, 1971).

LeCroy Bifurcated Stem. Kneberg (1956:28) describes this type as follows: "The basic shape is trianguloid with straight or incurvate side edges. The blade edges are usually serrated, often deeply so, resulting in a series of several sharp barbs from the tip to the shoulders. The stem varies from straight to slightly flared, and is usually deeply bifurcated. The edges of the stem are finely chipped, and occasionally finished by being ground smooth. The majority are small, and have broad proportions. Even the medium-sized examples are relatively broad." *LeCroy Bifurcated Stem* points have been found in stratified, late Early Archaic contexts (ca. 6,500-5,800 B.C.) at the Rose Island, Icehouse Bottom, Patrick, Bacon Farm, and Calloway Island sites in southeast Tennessee (Chapman 1975, 1977, 1978, 1979) and at the St. Albans site in West Virginia (Broyles 1966, 1971).

Kanawha Stemmed. Broyles (1971:59) describes this type as having a "small triangular blade with a short rounded and shallow notched base." Points of this type have been recovered in stratified context at the Rose Island, Icehouse Bottom, Patrick, and Bacon Farm sites in southeast Tennessee (Chapman 1975, 1977, 1978) and at the St. Albans site in West Virginia (Broyles (1966, 1971), where they have been radiocarbon-dated to 6,100-5,800 B.C. No *Kanawha Stemmed* projectile points were identified in the study collection.

Kirk Serrated. Coe (1964:70) describes this projectile point type as having "a long narrow blade with deep serrations and a broad square stem." The base usually is straight and blunt but may be thinned and concave. *Kirk Serrated* is regarded as a late Early Archaic (ca. 6,000 B.C.) type.

Kirk Stemmed. Coe (1964:70) describes this projectile point type as having "a long daggerlike blade with deep serrations and a broad stem." The base typically is straight or slightly rounded. This type is similar to the *Kirk Serrated* type and probably dates to the late Early Archaic period (ca. 6,000 B.C.).

Stanly Stemmed. This projectile point type is characterized by a broad, triangular blade and a small, squared stem with an indented base (Coe 1964:35). *Stanly* projectile points date to the early Middle Archaic period (ca. 6,000-5,500 B.C.) and have been recovered in stratified contexts at the Icehouse Bottom, Howard, and Calloway Island sites in southeast Tennessee (Chapman 1977, 1979), and at the Doerschuk site in piedmont North Carolina.

Morrow Mountain I Stemmed. Coe (1964:37) describes this projectile point type as having "a small triangular blade with a short pointed base." The blade usually is broad relative to the length. Points of this type have been recovered in stratified, Middle Archaic (ca. 5,500-5,000 B.C.) contexts at the Doerschuk site in piedmont North Carolina (Coe 1964), and at the Icehouse Bottom and Howard sites in southeast Tennessee (Chapman 1977, 1979).

Morrow Mountain II Stemmed. The *Morrow Mountain II* projectile point type is defined by a long, narrow blade and a tapered stem (Coe 1964:37). This projectile point type is

associated with the Middle Archaic period (ca. 5,500-5,000 B.C.) and has been recovered in stratified context at the Doerschuk site in piedmont North Carolina (Coe 1964), and at the Icehouse Bottom and Howard sites in southeast Tennessee (Chapman 1977, 1979).

Guilford Lanceolate. The *Guilford Lanceolate* projectile point type is defined by "a long, slender, but thick blade with straight, rounded, or concave base" (Coe 1964:43). Coe (1964:44, 118), based upon excavations at the Doerschuk and Gaston sites in North Carolina, has suggested that the *Guilford Lanceolate* type dates from about 5,000-4,000 B.C. (i.e., Middle Archaic period).

Halifax Side-Notched. The *Halifax Side-Notched* type is described by Coe (1964:108) as having a "slender blade with slightly restricted base. Shallow side-notches. Base and side-notches were usually ground. The material most frequently used was vein quartz." The stratigraphic position of Halifax materials between Guilford and Late Archaic Savannah River strata at the Gaston site indicate a late Middle Archaic temporal association (Coe 1964:118).

Savannah River Stemmed. Coe (1964:44) describes this projectile point type as having "a large, heavy, triangular blade with a broad stem." Savannah River Stemmed projectile points were recovered in stratified context at the Doerschuk site (Coe 1964) and have been radio-carbon dated to ca. 3,000-1,800 B.C. at the Bacon Bend site in southeast Tennessee (Chapman 1981).

Small Savannah River Stemmed. This projectile point type is described by Oliver (1981:181) as "a small to medium sized, broad, triangular bladed point with a rectangular stem and a straight or slightly excurvate base. It is regarded as a late variant of the *Savannah River Stemmed* type.

Gypsy Stemmed. Oliver (1981:188) describes this type as "a small, triangular bladed point with a square or rectangular straight stem, and a straight, slightly incurvate base, or excurvate base." It has been recovered from stratified, Early Woodland (ca. 1,000 B.C.-A.D. 1) contexts at the Warren Wilson, Doerschuk, Gaston, and Thelma sites (see Oliver 1981:189).

Swannanoa Stemmed. Keel (1976:196) describes this projectile point type as "a small, thick, triangular-bladed point with a relatively long stem. This type was associated with the Early Woodland Swannanoa component (ca. 500 B.C. - A.D. 1 ?) at the Warren Wilson site.

Badin Crude Triangular. Coe (1964:45) describes this type as "a large, crudely made triangular point" that was made solely by direct percussion. An Early Woodland context is assumed.

Transylvania Triangular. This type is "a large, thick, straight-bladed point with an incurvate or straight base" (Keel 1976:130). An Early to Middle Woodland cultural association is suggested for this western North Carolina point type.

Garden Creek Triangular. Keel (1976:130) defined this type as "a long, narrow, concave-based isosceles triangle usually made of quartzite," and considered it to be associated with the

late Pigeon and early Connestee phases of the Middle Woodland period in western North Carolina.

Copena Triangular. This type is defined as "a medium to large, trianguloid point. The sides of the hafting area are usually parallel" (Cambron and Hulse 1964:26). Projectile points of this type were recovered from the premound humus and primary mound fill at Garden Creek Mound No. 2 and are attributed to the Middle Woodland Connestee phase in western North Carolina. No *Copena Triangular* projectile points were identified in the study collection.

Connestee Triangular. Keel (1976:131) defines this type as "a medium-sized isosceles triangle usually made of chert." *Connestee Triangular* points usually have straight to incurvate lateral edges and a straight to slightly excurvate base. This type is associated with the Middle Woodland Connestee phase in western North Carolina.

Haywood Triangular. This projectile point type is defined as "a small, equilateral, triangular point with a straight or incurved base," and is thought to be associated with the late Connestee phase (Keel 1976:132-133).

Yadkin Large Triangular. This type is described by Coe (1964:45) as "a large, symmetrical, and well-made triangular point," that usually has a concave base. This projectile point type is associated with the Early-Middle Woodland Yadkin phase in piedmont North Carolina.

Roanoke Large Triangular. Coe (1964:110) describes this type as a "large, well-made, triangular point with slightly concave base and sides. Usually made from argillite, but also from vein quartz and quartzite." This is a Middle to early Late Woodland type originally identified at the Gaston site on the Roanoke River, and appears to be equivalent to the Uwharrie and Caraway types of the central North Carolina Piedmont.

Uwharrie Triangular. This type is a thin, well-made, medium-sized, triangular point that has been finely retouched and has a straight to slightly incurvate base. It is intermediate in size and form to the earlier *Yadkin Large Triangular* and later *Caraway Triangular* types, and is associated with the early Late Woodland period in piedmont North Carolina.

Pee Dee Pentagonal. This projectile point type is described by Coe (1964:49) as "a small asymmetrical and carelessly made point. . . . Pentagonal in form, usually asymmetrical. Some specimens, however, were very carefully and symmetrically made." Although this type is associated largely with the late prehistoric Pee Dee phase in the southern North Carolina Piedmont, *Pee Dee Pentagonal* points also occur infrequently on late prehistoric and historic sites elsewhere in the Piedmont.

South Appalachian Pentagonal. Keel (1976:133) defines this type as "a small pentagonal point with a straight base made of chert," and suggests that it may have a Connestee phase association in western North Carolina. The presence of similar points on Late Woodland and

Early Mississippian sites in nearby southeast Tennessee suggest a somewhat broader cultural and temporal association (see Kimball 1985:60).

Pisgah Triangular. This type is a small isosceles or equilateral triangle that has a flat or slightly concave base (Dickens 1976:135; Keel 1976:199), and was the predominant projectile point associated with the late prehistoric Pisgah component at the Warren Wilson site.

Madison. This type is a small, thin, triangular projectile point with straight lateral edges and a straight or slightly concave base (Scully 1951; Keel 1976:53-54). This projectile point type has a general South Appalachian Mississippian cultural association in western North Carolina.

Caraway Triangular. This type is a small, straight-sided, isosceles-triangular point with a straight or slightly incurvate base (Coe 1964:49). Projectile points of this type vary considerably in quality of workmanship, and are associated with the Late Woodland and early Historic period cultures of the North Carolina Piedmont.

Clarksville Small Triangular. Coe (1964:112) describes this projectile point type as a "very small triangular point, equilateral in shape and almost always made from vein quartz." Although Coe considers this type to be associated with the historic period in the Clarksville area, it probably is associated with the late prehistoric period as well.

Randolph Stemmed. According to Coe (1964:50), projectile points of this type "looked like crude miniature versions of the old Morrow Mountain II type. They had a roughly tapered stem, and they were narrow and thick. The chipping was exceedingly rough and crude, and most of the flakes were irregular and poorly controlled. In many instances this produced a saw-toothed edge. The most interesting characteristic about these points, however, is that they almost always show that they had been made from old flakes or broken points of an earlier period." Although this type is attributed to "destitute bands" of the eighteenth century, they are rare to absent at virtually all Piedmont sites that have produced historic trade artifacts. Because of this, their exact temporal association is considered uncertain. Points of this type probably are late prehistoric in age.

Projectile Point (Notched). This category identifies whole projectile points that are notched but cannot be attributed to a specific type. They probably date to the Archaic period.

Projectile Point (Stemmed). This category identifies whole projectile points that are stemmed but cannot be attributed to a specific type. Most of these probably date to the Archaic or Early Woodland periods.

Projectile Point (Triangular). This category identifies whole projectile points that are triangular in form but cannot be attributed to a specific type. They probably date to the Middle Woodland, Late Woodland, or Historic periods.

Projectile Point Fragment (Notched/Stemmed). This category identifies notched or stemmed projectile point fragments that cannot be attributed to a specific type. They probably date to the Archaic period.

Projectile Point Fragment (Triangular). This category identifies triangular projectile point fragments that cannot be attributed to a specific type. They probably date to the Middle Woodland, Late Woodland, or Historic periods.

Projectile Point Fragment (Indeterminate). This category identifies projectile point fragments (mostly distal ends) that cannot be attributed to a specific type.

### Other Artifact Type Descriptions

The following descriptions are of formal scraper types defined by Coe (1964:73-79) during his analysis of unifacial tools from the Hardaway site, and are regarded as generally diagnostic of the late Paleo-Indian Hardaway phase and Early Archaic Palmer and Kirk phases.

End Scraper (Type I). According to Coe (1964:76), end scrapers of this type "are basically triangular or trapezoidal in form and they were made from a thick prismatic flake. Many of the specimens retained the bulb of percussion on their underside and nearly all of them have been used until their cutting edge has worn smooth."

End Scraper (Type II). According to Coe (1964:76), end scrapers of this type "were made from flakes of random shapes and sizes and they were retouched only along the narrowest part to form a scraping edge."

End Scraper (Type III). End scrapers of this type are "large and rough duplications of the more finely made type I variety. . . . They were roughly chipped along the edges into an oval shape and worked across the broad end. Unlike the type I end scrapers, though, these working edges were never worn smooth" (Coe 1964:76). No end scrapers of this type were identified in the study collection.

Side Scraper (Type I). Scrapers of this type "were made from large, wedge-shaped flakes that were struck from a flat or prepared striking platform. Most of these specimens retained a considerable portion of this platform, as well as the bulb of percussion, in their finished form. The working edge of this type was rounded or crescent shaped and either one or both edges were rounded and curved back. The working edge remained sharp and irregular" (Coe 1964:77).

Side Scraper (Type II). According to Coe (1964:79), "this type of scraper was made from a large irregular flake, and unlike the type I side scraper, there was no attempt to shape the working edge into any other form than what existed. These large flakes were simply picked up, sharpened, and used." No side scrapers of this type were identified in the study collection.

Side Scraper (Type III). According to Coe (1964:79), "this type is very similar to type II

and differed only in the selection of a relatively thin and narrow flake." No side scrapers of this type were identified in the study collection.

Pointed Scraper. "This type appears to be an adaptation of the type II side scraper. It was made from a thick flake with two sides shaped to form a definite point" (Coe 1964:79). No scrapers of this type were identified in the study collection.

Oval Scraper. Two varieties of oval scrapers were recognized at the Hardaway site. "One was made from a relatively thin flake and the other was made from a thick exterior spall that retained large areas of the original weathered surface" (Coe 1964:79).

### Raw Material Types

All analyzed artifacts were classified into one of nine raw material categories. These categories are based upon macroscopic characteristics of mineral content and structure, and are as follows: metavolcanic (including rhyolite, argillite, welded tuff, vitric tuff, felsic tuff, and porphyry), chert (including both ridge-and-valley and coastal plain cherts), jasper, chalcedony, quartz, quartz crystal, quartzite, indeterminate due to heavy patination, and indeterminate.

### Modification Types

Modifications made to a projectile point, though rare, also were recorded when observed, and included (1) recycling into a drill (2) and recycling into an end scraper. This attribute is not summarized in the Appendixes.

## RESULTS

The purpose of the Projectile Point Classification Project was to provide detailed cultural and chronological information on prehistoric archaeological sites in North Carolina through the typological classification of diagnostic lithic artifacts. Toward this end, descriptive data were generated for 22,244 projectile points and 105 unifacial scrapers. These artifacts came from 1,313 archaeological sites in 50 North Carolina counties (Table 3), and represent a wide range of types dating from the Paleo-Indian to Historic periods (Table 4).

Artifact collections from sites in Piedmont North Carolina, accessioned and cataloged by the RLA from the 1930s to the mid-1960s, were the focus of the study and were systematically examined. With the exception of artifacts from excavated contexts, all projectile points within these collections were classified. Numerous artifacts from Mountain and Coastal Plain sites, as well as from Piedmont sites collected in more recent years, also were analyzed as time permitted. These artifacts are from various donated collections and systematic reservoir and county surveys, including early New Hope and Falls Reservoir surveys, Gaston Lake, Wilksboro Reservoir,

Cowans Ford Reservoir, and the mountain county surveys conducted in the 1960s as part of the RLA's Cherokee Project.

Appendixes 1, 2, 3, and 4 contain data produced by the classification project and are on file at the Research Laboratories of Anthropology and the Office of State Archaeology. Their contents are as follows. Appendix 1 identifies all of the artifact collections that were studied as part of the project. This appendix also provides a detailed record of all RLA collections from North Carolina sites cataloged before 1980. Appendix 2 provides a detailed inventory of the analyzed artifacts by site, catalog number, type, and raw material, and Appendix 3 provides a more general summary of artifact types by site. Finally, Appendix 4 provides a list of cultural components identified at each site, based upon projectile point occurrence. These inventories (also provided on computer diskettes) contain specific data that can be used by the Office of State Archaeology to identify cultural components at the 1,313 sites represented in the study. By examining the frequency distribution of projectile point types at a particular site, these data can also be used to make a general assessment of the relative intensity of occupation through time. Finally, these data comprise an important source of information for future research related to regional settlement patterns and raw material utilization.

## CONCLUSIONS AND RECOMMENDATIONS

The Projectile Point Classification Project was undertaken to provide detailed cultural and chronological information that could be used to enhance North Carolina's archaeological site inventory, maintained by the Office of State Archaeology. Although there was no specific research problem to be addressed, the results of this project hopefully will contribute significantly to future archaeological studies that rely upon existing site survey records. It also is hoped that this project has demonstrated the vast information potential that exists in curated artifact collections--a potential that can be tapped in a very cost-effective manner.

This project originally was envisioned as a pilot study to determine the feasibility of more extensive analysis of existing collections. The results far exceeded our expectations, and suggest that the continuation of the project would be equally productive, given the availability of necessary funding and qualified personnel.

Although a large number of artifacts from well over 1,000 sites were typologically classified during this relatively modest project, a substantial portion of the RLA's collections remain unanalyzed (see Appendix 1). Specifically, a majority of the projectile points collected by or donated to the RLA over the last 20 to 25 years have never been classified, nor have many of the projectile points from earlier collections made in the Mountains and Coastal Plain. Classification of these remaining artifacts should be considered at some future date.

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Tr33	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr33	Indeterminate	Proj. Pt. Frag. (Indet)	22
31Tr34	Middle Archaic	Morrow Mtn. II	1
31Tr34	Late Archaic	Savannah River	1
31Tr34	Late Archaic	Savannah River	1
31Tr34	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr35	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr38	Late Archaic	Savannah River	1
31Tr38	Late Archaic	Savannah River	3
31Tr38	Late Archaic	Small Savannah River	1
31Tr38	Late Archaic	Gypsy	2
31Tr38	Middle Woodland	Haywood	2
31Tr38	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr38	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr39	Middle Archaic	Morrow Mtn. II	1
31Tr39	Late Archaic	Gypsy	1
31Tr39	Late Archaic	Gypsy	1
31Tr39	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr39	Indeterminate	Proj. Pt. Frag. (Indet)	13
31Tr39	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr40	Late Archaic	Savannah River	1
31Tr40	Late Archaic	Gypsy	1
31Tr40	Middle Woodland	Haywood	1
31Tr40	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr41	Late Archaic	Savannah River	1
31Tr42	Middle Archaic	Morrow Mtn. II	1
31Tr42	Late Archaic	Savannah River	1
31Tr42	Late Archaic	Gypsy	1
31Tr42	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr42	Indeterminate	Proj. Pt. Frag. (Indet)	15
31Tr42	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr42	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr44	Middle Woodland	Haywood	1
31Tr44	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr45	Late Archaic	Small Savannah River	1
31Tr45	Late Archaic	Gypsy	1
31Tr45	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr46	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr47	Early Woodland	Badin	1
31Tr47	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr48	Middle Archaic	Morrow Mtn. II	2
31Tr48	Indeterminate	Proj. Pt. Frag. (Indet)	17
31Tr51	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr51	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr51	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr51	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr52	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr55	Late Archaic	Gypsy	1
31Tr57	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr58	Late Archaic	Gypsy	1
31Tr59	Late Archaic	Gypsy	1
31Tr59	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	2

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Tr59	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr60	Late Archaic	Small Savannah River	2
31Tr61	Late Archaic	Small Savannah River	1
31Tr61	Indeterminate	Proj. Pt. Frag. (Indet)	13
31Tr61	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr62	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr63	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr65	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr66	Late Archaic	Gypsy	1
31Tr66	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr67	Late Archaic	Savannah River	1
31Tr67	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr67	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr69	Late Archaic	Savannah River	2
31Tr69	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr69	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr70	Late Archaic	Savannah River	2
31Tr70	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr71	Woodland (Indeterminate)	Proj. Pt. (Triangular)	1
31Tr72	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr72	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr73	Late Archaic	Savannah River	1
31Tr74	Archaic (Indeterminate)	Proj. Pt. (Notched)	1
31Tr75	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr76	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr76	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr77	Late Archaic	Savannah River	1
31Tr77	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr77	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr77	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr78	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr79	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr80	Middle Archaic	Morrow Mtn. II	1
31Tr80	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr81	Late Archaic	Gypsy	1
31Tr81	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr82	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr84	Middle Woodland	Haywood	1
31Tr84	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr86	Middle Woodland	Haywood	1
31Tr86	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr87	Late Archaic	Gypsy	1
31Tr87	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr87	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr88	Late Archaic	Gypsy	1
31Tr88	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr88	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr89	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr89	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr89	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr90	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr91	Indeterminate	Proj. Pt. Frag. (Indet)	1

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Tr93	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr95	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr96	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr96	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr97	Late Archaic	Gypsy	1
31Tr97	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr97	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr97	Indeterminate	Proj. Pt. Frag. (Indet)	5
31Tr98	Late Archaic	Savannah River	1
31Tr98	Indeterminate	Proj. Pt. Frag. (Indet)	7
31Tr99	Late Archaic	Savannah River	1
31Tr101	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr102	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr103	Middle Archaic	Morrow Mtn. II	1
31Tr104	Late Archaic	Gypsy	1
31Tr106	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr107	Early Archaic	Palmer	1
31Tr108	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr109	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr110	Late Archaic	Savannah River	1
31Tr110	Late Archaic	Gypsy	1
31Tr110	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr111	Middle Archaic	Morrow Mtn. II	1
31Tr111	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr112	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr113	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr113	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr113	Indeterminate	Proj. Pt. Frag. (Indet)	5
31Tr113	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr114	Middle Archaic	Morrow Mtn. II	1
31Tr114	Late Prehistoric	Pisgah	4
31Tr114	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr114	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr114	Indeterminate	Proj. Pt. Frag. (Indet)	17
31Tr115	Middle Archaic	Morrow Mtn. II	4
31Tr115	Late Archaic	Gypsy	2
31Tr115	Late Archaic	Gypsy	1
31Tr115	Archaic (Indeterminate)	Proj. Pt. (Notched)	1
31Tr115	Middle Woodland	Haywood	1
31Tr115	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr115	Indeterminate	Proj. Pt. Frag. (Indet)	26
31Tr115	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr116	Middle Archaic	Morrow Mtn. II	1
31Tr116	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr116	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr117	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr118	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr119	Late Archaic	Small Savannah River	1
31Tr119	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr120	Late Archaic	Gypsy	1
31Tr120	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr121	Indeterminate	Proj. Pt. Frag. (Indet)	1

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Tr121	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr123	Late Archaic	Savannah River	1
31Tr123	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr123	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr124	Late Archaic	Savannah River	1
31Tr124	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr125	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr126	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr127	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr128	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Tr128	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr129	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr130	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Tr131	Late Archaic	Gypsy	1
31Tr131	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr132	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Tr133	Middle Archaic	Guilford	1
31Tr133	Late Archaic	Savannah River	1
31Tr133	Late Archaic	Savannah River	3
31Tr133	Late Archaic	Small Savannah River	1
31Tr133	Late Archaic	Small Savannah River	4
31Tr133	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Tr133	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Tr133	Indeterminate	Proj. Pt. Frag. (Indet)	16
31Un1	Late Archaic	Savannah River	2
31Un1	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Un1	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Un2	Middle Archaic	Morrow Mtn. II	1
31Un2	Archaic (Indeterminate)	Proj. Pt. (Notched)	1
31Un2	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Un3	Late PaleoIndian	Hardaway Side-Notched	3
31Un3	Late PaleoIndian	Hardaway Side-Notched	2
31Un3	Late PaleoIndian	Hardaway Side-Notched	1
31Un3	Late Paleo/Early Archaic	End Scraper I	1
31Un3	Early Archaic	Kirk Serrated	6
31Un3	Early Archaic	Kirk Serrated	1
31Un3	Early Archaic	Kirk Stemmed	4
31Un3	Early Archaic	Palmer	1
31Un3	Early Archaic	Palmer	26
31Un3	Early Archaic	Palmer	17
31Un3	Early Archaic	Kirk Corner-Notched	7
31Un3	Early Archaic	St. Albans	3
31Un3	Middle Archaic	Stanly	7
31Un3	Middle Archaic	Morrow Mtn. I	1
31Un3	Middle Archaic	Morrow Mtn. II	6
31Un3	Middle Archaic	Morrow Mtn. II	74
31Un3	Middle Archaic	Morrow Mtn. II	72
31Un3	Middle Archaic	Morrow Mtn. II	5
31Un3	Middle Archaic	Morrow Mtn. II	51
31Un3	Middle Archaic	Morrow Mtn. II	53
31Un3	Middle Archaic	Guilford	31
31Un3	Middle Archaic	Guilford	1

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Un3	Middle Archaic	Guilford	12
31Un3	Middle Archaic	Guilford	97
31Un3	Middle Archaic	Guilford	1
31Un3	Middle Archaic	Guilford	12
31Un3	Middle Archaic	Guilford	7
31Un3	Middle Archaic	Guilford	7
31Un3	Middle Archaic	Guilford	43
31Un3	Middle Archaic	Guilford	258
31Un3	Middle Archaic	Guilford	1
31Un3	Middle Archaic	Guilford	181
31Un3	Late Archaic	Savannah River	20
31Un3	Late Archaic	Savannah River	44
31Un3	Late Archaic	Savannah River	16
31Un3	Late Archaic	Savannah River	55
31Un3	Late Archaic	Small Savannah River	9
31Un3	Late Archaic	Small Savannah River	19
31Un3	Late Archaic	Small Savannah River	6
31Un3	Late Archaic	Small Savannah River	33
31Un3	Late Archaic	Small Savannah River	6

31Wr23	Late Archaic	Gypsy	1
31Wr23	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Wr23	Woodland (Indeterminate)	Proj. Pt. (Triangular)	1
31Wr23	Indeterminate	Proj. Pt. Frag. (Indet)	12
31Wr23	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr23	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Wr24	Late Archaic	Savannah River	1
31Wr24	Late Prehistoric	Caraway	2
31Wr24	Indeterminate	Proj. Pt. Frag. (Indet)	4
31Wr24	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr28	Middle Archaic	Morrow Mtn. II	1
31Wr28	Middle Woodland	Yadkin	1
31Wr28	Late Prehistoric	Caraway	1
31Wr28	Late Prehistoric	Pee Dee	2
31Wr28	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr28	Indeterminate	Proj. Pt. Frag. (Indet)	3
31Wr30	Late Archaic	Savannah River	2
31Wr30	Late Archaic	Savannah River	1
31Wr31	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr31	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr32	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr34	Early Archaic	Palmer	1
31Wr34	Late Archaic	Savannah River	1
31Wr34	Woodland (Indeterminate)	Proj. Pt. (Triangular)	1
31Wr34	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr35	Middle Archaic	Morrow Mtn. II	1
31Wr35	Late Archaic	Gypsy	1
31Wr35	Late Prehistoric	Caraway	1
31Wr35	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr35	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr37	Middle Archaic	Guilford	1
31Wr37	Middle Archaic	Guilford	2
31Wr37	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr37	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr37	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr37	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr38	Late Archaic	Gypsy	1
31Wr38	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr40	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr40	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr42	Late Archaic	Savannah River	1
31Wr42	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr43	Late Archaic	Savannah River	2
31Wr43	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Wr46	Late Archaic	Savannah River	1
31Wr47	Early Archaic	Palmer	1
31Wr47	Archaic (Indeterminate)	Proj. Pt. (Notched)	1
31Wr47	Late Prehistoric	Caraway	2
31Wr47	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr49	Late Archaic	Savannah River	1
31Wr50	Early Archaic	Kirk Stemmed	1
31Wr50	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Wr51	Early Archaic	Palmer	1
31Wr51	Late Archaic	Savannah River	1

## Appendix 4. Summary of Cultural Components by Site.

Site	Cultural Period	Artifact Type	Frequency
31Wr51	Late Archaic	Savannah River	1
31Wr51	Late Prehistoric	Caraway	1
31Wr51	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr51	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr52	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	2
31Wr52	Late Prehistoric	Caraway	6
31Wr52	Woodland (Indeterminate)	Proj. Pt. (Triangular)	2
31Wr52	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr54	Middle Archaic	Morrow Mtn. II	1
31Wr54	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr59	Late Prehistoric	Caraway	1
31Wr59	Indeterminate	Proj. Pt. Frag. (Indet)	2
31Wr59	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr60	Archaic (Indeterminate)	Proj. Pt. (Stemmed)	1
31Wr61	Middle Archaic	Guilford	1
31Wr61	Late Prehistoric	Caraway	1
31Wr61	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr64	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr68	Indeterminate	Proj. Pt. Frag. (Indet)	1
31Wr69	Middle Woodland	Yadkin	1
31Wr73	Late Prehistoric	Caraway	3
