 South profile

A - Weakly developed A-horizon - Very dark greyish Brown (10YR 3/2) silt loam with many roots

B - Mound Fill - Dark yellowish brown (10YR 4/4) silt loam - fairly homogenous

C₁ - Midden zone on moundslope - Very dark Brown (10YR 2/2) silt loam containing charcoal, burned clay, calcined bone, & sherds on surface.

C₂ - Midden zone - Very dark grayish brown (10YR 3/2) silt loam containing charcoal, burned clay, calcined bone.

C₃ - Possible disturbance/basketload - Very dark Brown (10YR 2/2) silt loam

D - Mound Fill - Heavily mottled zone of Brown (10YR 5/3) & Dark Yellowish Brown (10YR 4/4) silt loam with possible burned soil (5YR 4/6 Yellowish Red).

E₁ - Mound fill - Mostly homogenous zone of dark grayish brown (10YR 4/2) silt loam - some mottling

F - Buried A-Horizon - Very dark Gray (10YR 3/1) silt loam with charcoal flecks especially the surface of zone.

G - E-Horizon - Grayish Brown (10YR 5/2) silt

H - Clay cap? Associated w/Fea 1 - Heavily Mottled yellowish Brown (10YR 5/4) & light greenish gray (Gley 1 7/1) clay

I - Possible Post hole - (composed of dark grayish brown (10YR 4/2) silt loam

J - Clay cap? Associated w/Fea 1 / Fea 4 - Heavily Mottled yellowish Brown (10YR 5/4) & light greenish gray (Gley 1 7/1) clay

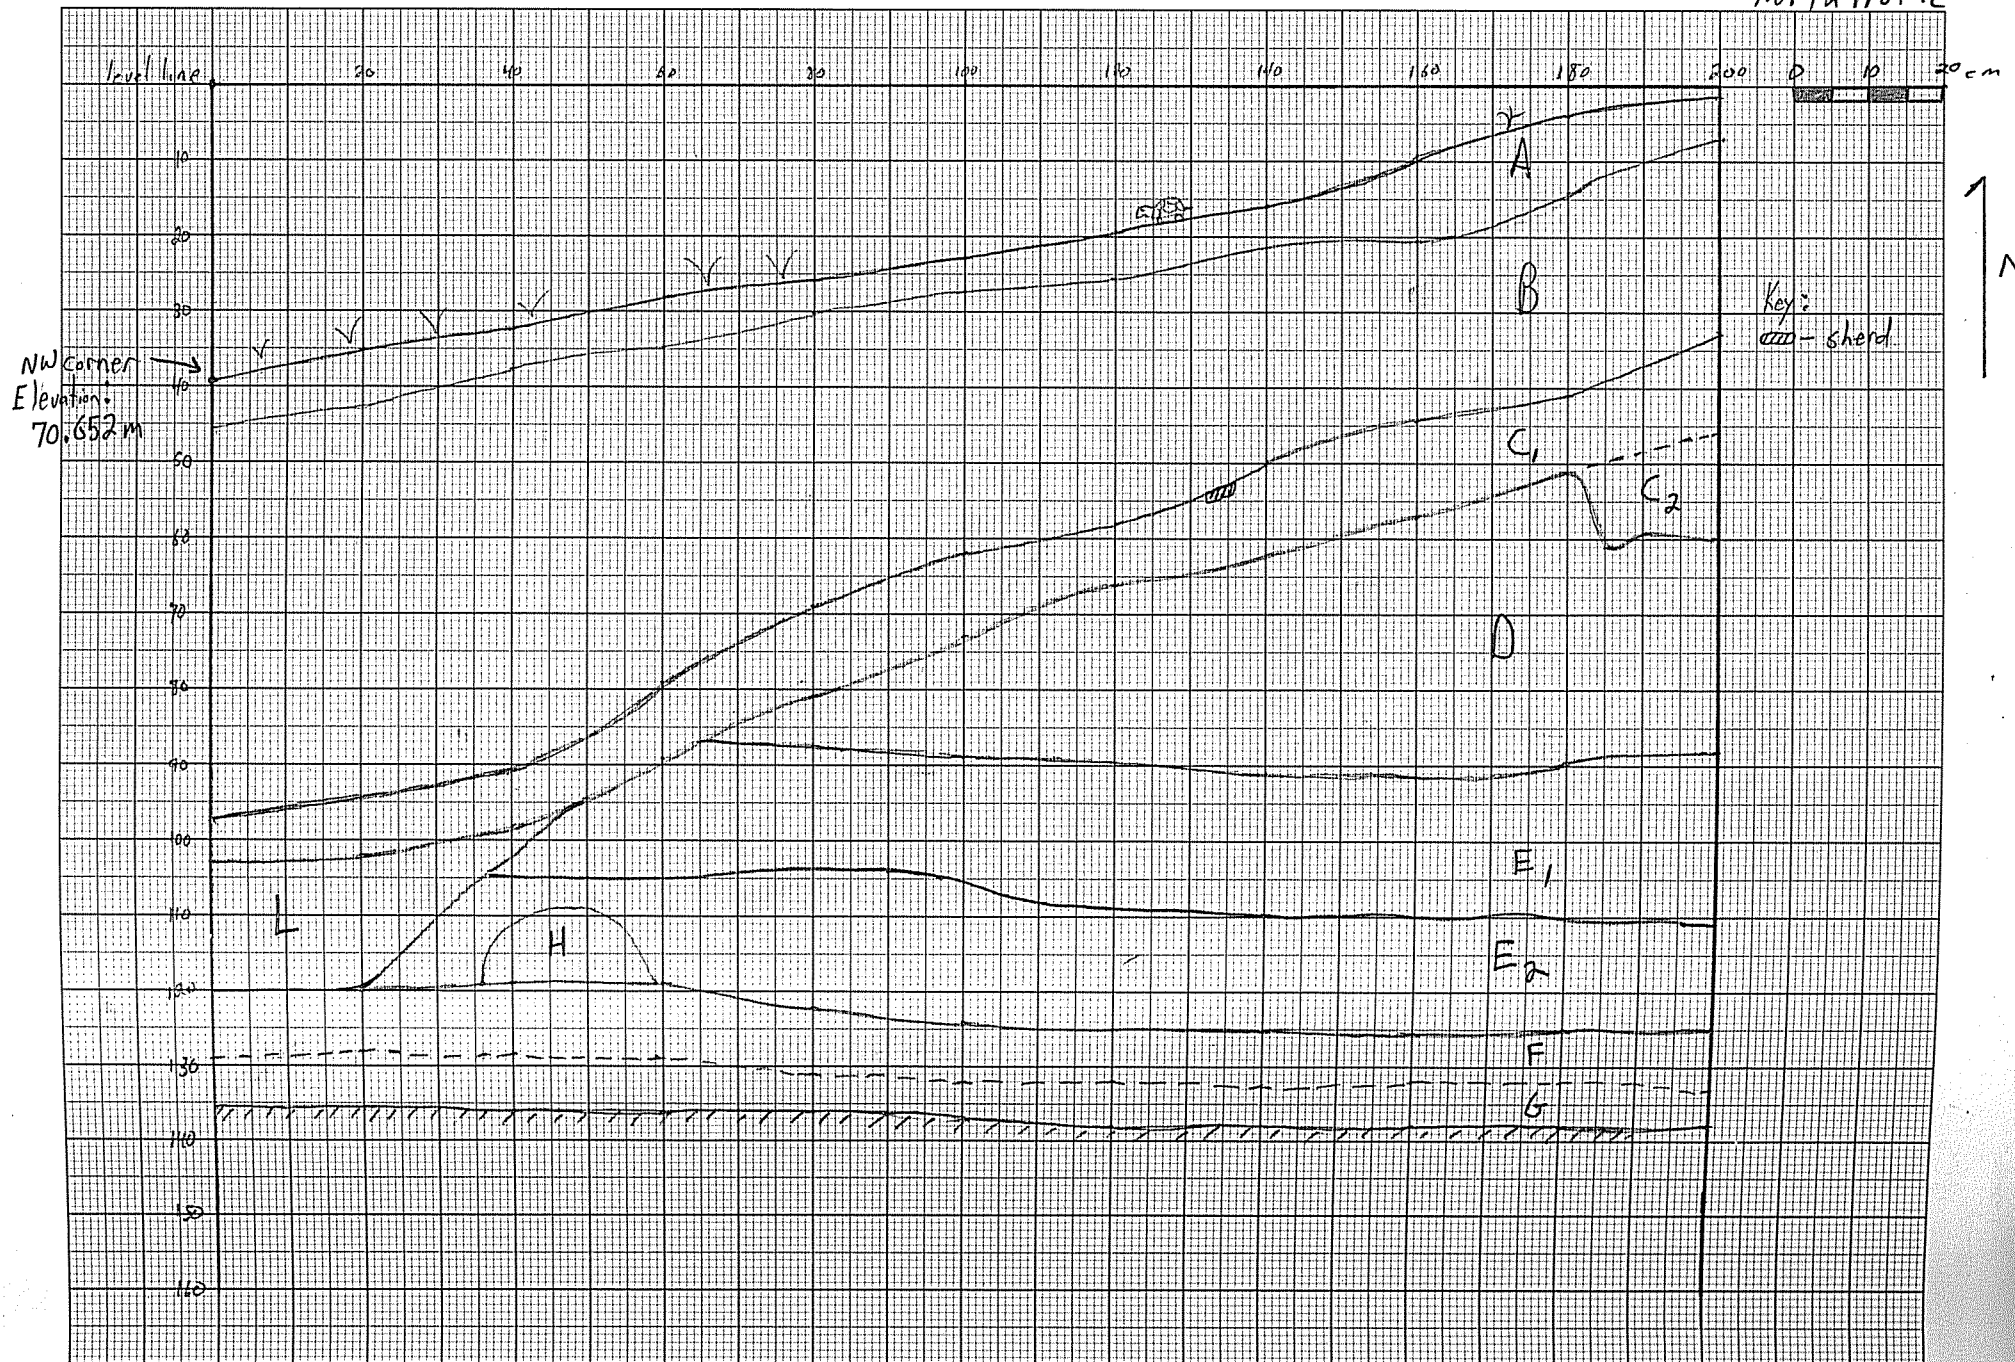

K - Associated w/Jⁿ - Dark gray (10YR 4/1) clay

E₂ - less mottled zone of dark grayish brown (10YR 4/2) silt loam.

L - Mound fill - heavily mottled dark yellowish brown (10YR 4/4) & dark grayish Brown (10YR 4/2)
